A.2) Mechanical Water Equipment Section

Many outdoor sales Engineers, executives are approaching projects under constructions, plumbing & Fire Fighting Contracting Companies & Industrial Factories to provide the service of supplying water equipments such as :

- **Lifting Pumps**
- **Booster Pumps**
- **Irrigation Pumps**
- **HVAC Pumps**
- **Circulating Pumps**
- **Deep Well Submersible Pumps**
- **Sewage Pumps**
- **Fire Pumps**
- **Level Indicators**
- **Water Heaters**
- **Sand Filters**
- **Pipes & Fittings**
- **Fountain Nozzles**
- **Valves**
- **Pressure & Float Switches**
- **Water Tanks**

Brief History (Mechanical Water Equipment Section):

Mechanical Water Equip. Section had supplied many projects & we brief some of the supplied locations as follows:

Product	Place of Installation
Booster Pumps	▪ Ahmadi Hospital
	▪ SAS Hotel
	▪ Motorways
	▪ Crown Plaza Hotel
	▪ Amiri Diwan

Sewage Pumping Station.

C) Technical Services Division

A Division with both the resource and expertise to manage large Site teams with the complete skills to undertake all aspects of Installations, Fabrications & Maintenance.

The Technical Services Division is an integral part of Arabi Company, which has grown since its establishment in 1982 into a highly diversified Mechanical, Electrical and Engineering Group consisting of three separate, independent and sub divisions are as follows:

C.1) Maintenance Section

One hour down time can mean both a considerable loss in production and revenue for our customers. In the sweltering temperature of Kuwait's summer, a power loss or electromechanical failure can also cause intense discomfort.

Our team of skilled service engineers and technicians ensure that the maintenance of equipment is planned to prevent any disruption of day to day operation. A large stock of spare parts is maintained to ensure that our crews can respond effectively and quickly to our customers calls for service.

C.2) Fabrication Section

From initial design to the final phase commissioning, the fabrication section is capable of taking jobs as diverse as the structural piping of tanks and vessels, to the manufacturing of booster pumps stations. No matter whether the project is of domestic or industrial size, our fully equipped workshops and fabrication areas are capable of producing quality products at speed.

C.3) Taxi Meter Section

As per Kuwait Traffic Dept. rule that all taxi in Kuwait should install Taximeter in their cars, this section has been established to install, program and maintain the taximeters for taxis as per the MOI Traffic Dept. Specifications and Standards.

C.4) Furmanite Leak Sealing Section

Furmanite International Limited has developed various techniques for working on pressurized vessels and pipelines. The company has more than sixty years of experience in the field of under pressure leak sealing and provide a specialist service capable of solving virtually any kind of leak problem.

Services

Pipeline intervention, including Hot tapping and pipe freezing allows modifications or repair of pipeline system without a need to shutdown. Trevitest of safety & relief valve testing developed and patented worldwide by Furmanite, Trevitest is operated in accordance with strict control procedures centered on the ISO 9001 quality system. Trevitest can test most of the safety and relief valve manufactured for use in Steam, Air, Gas Process and Water System.

Furmanite's On-Site Machining Service is geared to provide industry with fast, economical solutions to On-Site maintenance problems. Furmanite has progressively expanded this service through out the world such that we are able to perform a very wide variety of On-Site operations. These range from Flange Facing Machines, Milling & Boring, Through Drilling, Journal Turning & Pipe Cutting, Weld Preparations, Tyre Grinding and Valve Seat Lapping.
